Infoletter 4

Dear Sir / Madam,

Labelexpo is this year's European highlight of the label and package printing industry. BOGRAMA, Herzog+Heymann and MBO will be exhibiting at this trade show with a combined booth for the first time. Under the heading **COMPETENCE3** we are pooling our expertise and presenting three ground-breaking production lines. Today we'll have a closer look at one of our exhibits.

**World
Premiere**

**Creating folding cartons AND
placing inserts – ALL in ONE LINE**

Packaging-Line „Stamina“

Inline production of folding cartons with inserts

The folding cartons first will be die-cut in multiple-up production, then folded and last glued. On the same product line a pre-produced leaflet is placed and glued into the folding carton by a friction feeder. The integrated quality system will assure the right leaflet is placed into the correct folding carton. In addition the system monitors the glue application. Bad copies will be sorted on-the-fly. The concept of this packaging solution is modular; therefore depending on your production requirement additional units can be integrated.

We will produce the folding cartons at Labelexpo with:

- Rotary die-cutter BSR 550
- Pre-folding and folding unit
- Cold glue application system
- Friction feeder
- Quality inspection system including ejector unit
- Delivery with belt pressing unit

Your benefits:

- Pallet feeder for high volumes
- Efficient production because of in-line and multiple-up production
- Expandable when requirements are changing
- Well-proven solution from one source

In addition we will present two more production lines at Labelexpo:

- Die-cutting, counting and delivering of different labels
- Label booklets with die-cut pull-tab

Please note the date in your calendar. Your visit will be worthwhile.

Booth 9A16, 29th September till 2nd October 2015, Brussels

We are looking forward to seeing you.

Kind regards,

Daniela Bochsler
BOGRAMA AG
