 **Swiss Made**

Flexible Stream Delivery with Spreading Technology

for ergonomic, efficient shingling, spreading,
and delivery in inline production.

The combination of **shingling and spreading** in a single process ensures a clean, structured flow of product streams and facilitates product pick-up. Especially for small formats in multi-up production, the **SAB 600 S** increases efficiency, improves handling and enhances flexibility in inline operations.

Clean separation of individual product streams.
Shingling rolls allow variable adjustment for different
format sizes.

Adjustable belts spread the shingled product streams. Simplifies picking from the delivery table.

Motorized height adjustment for ergonomic working.
Operating modes: continuous, sheet-by-sheet, jump feed

Applications:

Clean shingling, spreading, and stacking multi-up production with up to 9 product streams.

Formats:

Minimum product size: 42 mm x 63 mm
Maximum product size: 600 mm x 730 mm
Working width: 600 mm

Benefits:

Minimal setup times
Precise stream formation
Easy handling, even for small products
High flexibility for different product formats
