

YOU ARE INVITED

26 + 27 November 2025 — The Netherlands

SCREEN and **KOMORI**

 Pharma,  Digital printing and  Finishing

Crossover Event powered by:

You're Invited!

What happens when AI, digital, pharma, and printing come together? Find out at the two-day Crossover Event.

Experience machines in motion, inspiring talks by international speakers Bernd Zipper and Morten Reitoft, a special appearance by Veldhuis Media, and discover unique collaboration of technology and creativity.

Two days of live demonstrations, inspiration, and networking - where every moment could spark your next idea. — Register now.

When:

26 — 27 November 2025

Where:

Komori Graphic Centre-Europe (KGC-E)
Reactorweg 151, 3542 AD Utrecht
The Netherlands

Register now to secure your place at the Komori program of the Cross-over event.

The registration for the SCREEN program will be coordinated by SCREEN Europe located in Aalsmeer.

Program

Discover our tailored solutions, designed to meet your specific needs and goals. By your personal request, you're welcome to join us at any time throughout the day to experience them firsthand.

- 09:00** — Welcome and registration
- 10:00** — Official Opening,
Welcome to the Crossover Event!
- 10:05** — Unsurpassed Pharmaceutical Leaflet Folding
- 10:15** — Technology deep-dive;
M9 parallel folding unit from H+H
- 10:45** — Pinnacle of Performance,
the new Komori J-throne 29
- 10:55** — Expert Session from our special guest speakers!
- 11:30** — [Departure bus to the Inkjet Innovation Center in Aalsmeer Breakout session for SCREEN](#)
[Arrival 12:00 to evening*](#)
- 11:30** — [Engaging discussions and networking](#)
- 11:50** — Digital sheetfed Technology,
with the new Komori J-throne 29
- 12:00** — Technology deep-dive; J-throne 29 from Komori
- 12:30** — [Lunch Break and Networking](#)
- 13:30** — Next level die-cutting, unmatched in efficiency,
flexibility and quality
- 13:40** — Technology deep-dive;
BSR 550 Servo Rotary die-cutter from BOGRAMA
- 14:00** — Expert Session from our special guest speakers!
- 14:30** — [Engaging discussions and networking](#)
- 14:50** — Most flexible and reliable digital saddle-stitching
- 15:00** — Technology deep-dive;
MBO and Hohner Postpress
- 15:20** — Intercompany logistics,
with the Autonomous Mobile Robot (AMR)
- 15:30** — Connectivity, workflows and comprehensive
dashboards with KP-Connect and DataManager
- 15:45** — [Engaging discussions and networking](#)
- 17:00** — Closing

The program runs on both November 26 and 27.

**Activities only on the first day, Wednesday 26 November.*

Speakers

Discover **Veldhuis Media**

Veldhuis Media is a modern graphic media company specializing in full-colour productions. Over the past two decades, it has grown from a small printing house into one of the leading graphic companies in the Netherlands, producing brochures, magazines, catalogs, and book-like products with a focus on quality and innovation.

Known for its state-of-the-art facilities and dedicated team, Veldhuis Media combines technical expertise with creative solutions, making it a key player in the Dutch printing industry.

“We are very impressed with AMR’s performance – it has truly elevated our efficiency and production capabilities, setting a new standard for excellence in our operations.”

Meet **Morten B. Reitoff**

Founder and editor-in-chief of **INKISH**

Morten B. Reitoff is the founder and editor-in-chief of INKISH, a leading platform established in 2014 to promote knowledge sharing within the global graphic arts industry. With over 20 years of experience in the sector, Morten works closely with clients worldwide, supporting both sales and production operations. He is a recognized speaker at industry events, passionately fostering networking, innovation, and knowledge exchange. His deep insight into the evolving print and media landscape makes him a sought-after voice for trends, strategies, and technological developments.

“The future of print lies in knowledge sharing, collaboration, and embracing new ways to engage audiences worldwide.”

Meet **Bernd Zipper**

Founder and CEO of **zipcon consulting Germany**

Bernd Zipper is a leading expert in the print and media industry. With a background as a print and prepress stage manager and managing director, he established zipcon in 1998 to focus on e-business print, web-to-print, online print shops, print-on-demand and mass customization. His visionary strategies and hands-on approach have made him a sought-after consultant, speaker, and moderator worldwide. Bernd is the founder and chairman of the Initiative Online Print e.V. – the European Association of the Online Print Industry. As well he is the Host of the Online Print Summit – the global Network Meeting of the Online Print Industry, which takes place in Munich every spring.

“Print is not dying- print is changing- print is a guarantor of trust. With courage, drive, technology and entrepreneurial spirit, together we can drive forward the renaissance of print and thus open up one of the most powerful communication tools of our time to future generations.”

Crossover Network Café

Step into Crossover Network Café, a space designed to recharge, connect, and engage. Whether you need a brief moment to catch up on emails, handle important matters, or simply take a break, our café-style environment offers the perfect balance of work and relaxation. Meet like-minded professionals, spark meaningful conversations, and enjoy a setting that encourages networking, interactivity, and trust. Re-energize, connect, and make the most of your time in a welcoming and productive atmosphere.

Who is everyone

Komori

Efficiency in Motion: Reliable Partnerships, Profitable Results

Komori is delighted to host this special event, bringing our valued partners together to celebrate innovation, collaboration, and the future of print. For more than a century, Komori has been dedicated to advancing printing technology across the commercial, packaging, and currency markets. Our commitment to excellence extends beyond the pressroom — from state-of-the-art printing systems to smart automation solutions that enhance productivity, efficiency, and sustainability. At the Komori Graphic Centre Europe, we are proud to provide a hub where ideas come to life. Here, customers and partners experience hands-on demonstrations, expert training, and genuine inspiration. Bringing all of you together under one roof is a true highlight for us — a reflection of Komori's belief that progress happens when innovation and partnership unite.

Postpress Alliance

One vision, infinite solutions

The Postpress Alliance unites six leading companies — MBO, H+H, Hohner, BOGRAMA, Wohlenberg and baumannperfecta — to push the boundaries of print post-processing. By combining expertise in cutting, folding, die-cutting, saddle stitching, and perfect binding, they offer integrated solutions that enhance efficiency and quality. Their collaborative approach ensures seamless connectivity and automation across the production workflow, setting new standards in the industry.

SCREEN Europe

Innovating Digital Printing Solutions

SCREEN Europe has been at the forefront of innovation in the printing industry for over 50 years. As a leading developer of advanced digital inkjet printing technology, SCREEN Europe provides high-performance solutions that enable printing companies to meet today's demands for speed, quality, and efficiency.

Addressing key requirements in print quality and readability, thin paper handling, and precise inspection systems, SCREEN Truepress JET inkjet printing can meet all the stringent requirements for pharmaceutical leaflet production while bringing the flexibility, automation, and fast-turnaround times of digital printing necessary to remain competitive in an increasingly digital market.

MBO Postpress Solutions

Leading the Way in Folding Automation and Digitalization

MBO Postpress Solutions GmbH, founded in 1965 and now part of the Komori Group, delivers cutting-edge folding machines, feeders, deliveries, and peripherals, complemented by state-of-the-art automation and digitalization solutions for printing and bookbinding operations.

Their innovations include the CoBo-Stack collaborative robot for automated stacking, the K8RS high-speed folding machine, and the Datamanager 4.0 software for enhanced process control. These technologies simplify workflows, reduce labor costs, and maximize productivity — raising the bar for efficiency and innovation in the industry.

H+H

Precision Folding for the Smallest Formats

Discover the pinnacle of miniature folding technology with H+H, part of the MBO Group under the Komori umbrella. With over seventy years of expertise, H+H delivers exceptional precision, reliability, and innovation in folding solutions for pharmaceutical inserts and product information leaflets.

See a live demonstration of a complete, fully automated pharmaceutical folding line — from unwinding and sheeting to parallel and crossfolding — featuring the flagship M9.32, KB60, and XP-R25 systems. Integrated through the advanced MBO M1 control system, the line exemplifies seamless automation and uncompromising quality. Experience how H+H continues to set the standard for high-performance folding in the smallest formats, combining engineering excellence with innovative automation.

Hohner

Making a printer's life easier

With a proud 95-year history, Hohner has specialized in designing and manufacturing innovative machines for the printing industry. For over 30 years, the company has been a global leader in narrow stitching heads, continuously expanding from small wire stitching machines to advanced saddlestitchers, achieving technological leadership—especially in digital finishing. Its range now includes semi- and fully automated models capable of handling even large formats for digital finishing. At the event, Hohner will showcase its modular HHS-FUTURA 9 saddle stitching system in digital finishing mode. A demonstration will highlight seamless connectivity via the T50 folding machine with pile feeding from MBO Postpress Solutions GmbH, ensuring reliable finishing for variable digitally printed content. Offering maximum flexibility across signature, stack, and roll feeding modes, the HHS-FUTURA 9 meets the evolving demands of modern print production.

BOGRAMA

“next level die-cutting” for Diverse Applications

BOGRAMA AG (Switzerland) specializes in high-precision and process-optimized die-cutting solutions. Their machines are designed for producing labels, playing cards, folding boxes, folders, greeting cards, mailings and more, in one-up or multiple-up productions. BOGRAMA's commitment to innovation is evident in their development of automated systems, such as the inline die-cutting, collating, and stacking system for playing cards as well as delivery and robot solutions that enable seamless workflows. The BSR 550 rotary die cutter exemplifies their dedication to quality and efficiency, offering nick-free die-cutting and inline waste removal. With a focus on short setup times, user-friendliness, and utmost precision, BOGRAMA ensures cost-optimized, contemporary production solutions – or simply: next level die-cutting.

Wohlenberg

Precision in Gathering, Gluing, and Cutting

Wohlenberg Buchbindesysteme GmbH, based in Verden, Germany, specializes in high-quality postpress solutions, focusing on gathering, perfect binding, and three-knife trimming. Their modular Sprinter gathering machines offer flexibility for both standalone and inline operations. The Vento perfect binder supports hotmelt, cold glue, and PUR gluing, featuring separate spine and side gluing units for optimal adhesion. Complementing these, Wohlenberg's three-knife trimmers provide efficient trimming solutions to ensure finished products meet precise specifications. These systems are designed for high automation, reduced setup times, and adaptability to various production needs.

baumannperfecta

Revolutionizing Cutting Automation

baumannperfecta, a leading German manufacturer of postpress solutions, has pioneered fully automated jogging and cutting systems. Their flagship system, the BASA Evolution, utilizes innovative technology to automate the precise handling and alignment of printed sheets, ensuring consistent and efficient processing. Coupled with the RC Robotic Cutting System, these solutions enable an unmanned cutting process, reducing labor costs and enhancing productivity. Designed for various applications, including commercial printing and label production, baumannperfecta's systems offer modular and scalable solutions tailored to meet diverse production needs.

YASKAWA

Global technology provider

YASKAWA is a world leading manufacturer of industrial robots, drives and motion control with over 600.000 MOTOMAN robots installed worldwide. The European headquarters is in Frankfurt, with factories for robots, controllers, accessories, turnkey and customised robot systems located in Sweden, Germany, and Slovenia.

YASKAWA is a company driven by the vision of a smarter future with advanced technologies that save precious time and energy. For us, any given day is a new opportunity to make progress.

Registration is required to attend our Crossover Event. Discover our tailored solutions, designed to meet your specific needs and goals. By personal request, you're welcome to join us at any time throughout the day to experience them firsthand. To schedule a dedicated one-on-one demo during the event, simply contact your local sales representative — they'll be happy to arrange a time that works best for you.

Don't miss this opportunity to explore, connect, and make the experience truly your own!
